

D. W. C. NEWS

August 2007

Welcome

to the third edition of the Dungannon Window Company Newsletter.

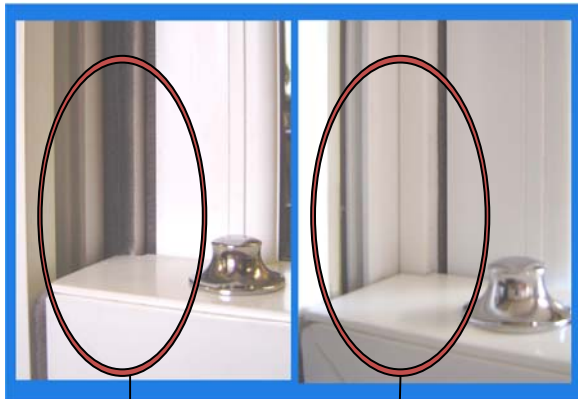

In this issue we explore new additions to our white sash windows and investigate the best possible scenario for air sealing.

As always we hope that this newsletter will be informative to you and should you have any queries on any article, we will be at hand for advice.

If you would like to receive this newsletter by email, please send your details to andrea@dungannonwindows.co.uk

Where is the Woolpile?

Diagram Showing the before & after the PVC-u strip is added

Woolpile

Woolpile
Replaced

Woolpile weather seal (brush seals) are an important part of the sash window. At DWC we use a seal with a central plastic strip which helps retain its shape and increases the resistance to draughts and water egress.

As the woolpile above the inside sash and the woolpile below the outside sash do not help with the sealing of the window we have replaced this with a **new PVC-U insert strip**. This improves the visual look of the window dramatically and leaves the frame easier to clean.

The PVC-U insert strip is fitted at **no extra cost** on white windows and will be used on our foiled products as it becomes available.

Air Seal Baffle

Foam has been used for years in the music industry to buffer sound, so why not use this technology elsewhere.

This is exactly what we have done. Using this concept we are now fitting air seal baffles to all our windows.

So what is it?

Basically the new air seal baffle is a section of foam which sits level at the bottom of the outer spiral balance.

What are the benefits?

By fitting this to all our windows we have now managed to reduce any airflow which may have in the past found a way through the sash window.

The Cost?

We are now fitting these air seals to all our windows as standard at **no extra cost!**

Manufacturers of PVC-U Vertical Sliding Sash Windows

Exhibition News

DWC are in Dublin this September with our windows being displayed at;

Self Build Extend & Renovate

Punchestown Racecourse 7 – 9 Sept
Visit us at Stand no E19

&

Building Exhibition

Simmons court, RDS 20 – 22 Sept
Visit us at Stand no 71

Please feel free to visit us at any of these exhibits; we would be delighted to see you. Complimentary tickets are available on request. *(limited tickets available)*

Introducing the NEW BLACK . . .

DWC are pleased to announce the new

Schwarz—Braun FOIL GRAIN

PVC-u vertical sliding sash window which is now exclusively being manufactured at our Dungannon Factory.

The new foil which is a light shade of black is already used extensively by casement window suppliers across Ireland.

Being the **only** manufacture of White Grain pvc-u Sliding Sash in Ireland & the **First** to bring you cream, D W C are always striving to meet customer needs.

Old faithful, white, oak and rosewood are still readily available.

Call us today for a free quote or use the faxback for more information

We look forward to hearing from you

Investing For The Future

WELDER

We are always striving to make our sliding sash better. To make sure all our sashes are welded 100% square we have purchased a new **Four Head Vertical Quad Welder**. Not only does this speed up our production but also gives us a much neater and accurate weld.

BENDS

To improve and maximise our bending potential, we have now moved on from our hot oil method of bending and purchased **the latest Quartz Emitter Advanced Bending Technology machine** from G M Formers. We can now bend down to 900mm radius and with practice we should get lower than this.

Delivery

Joining our fleet is a New 20 Foot Iveco Lorry which will enable us to cope with bigger and more awkward loads.
