

Dungannon Window Company Ltd

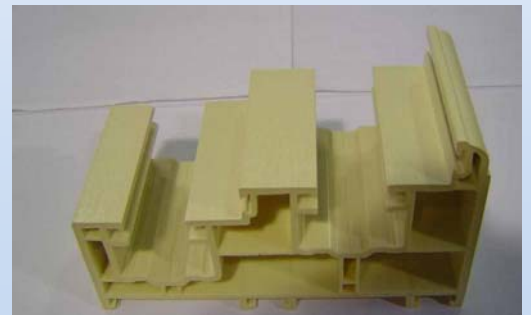

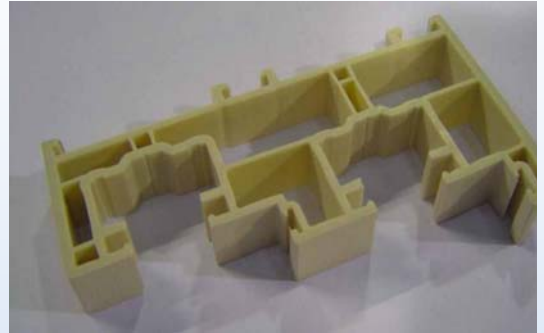

A product that you can rely on

AT LONG LAST!

eurosash has a cream foiled outer frame on a cream profile. From January onwards all cream sliding sash will have a cream base which is then foiled. No longer will you have customers saying they can see a little bit of white on the frame. The good news, our price will stay the same so quotes already done will not be altered.

In an ever dwindling and competitive market the **euro**sash ticks all the boxes as the leading sliding sash, our new 'A' rating will give you a distinct selling advantage.

Below the new cream **euro**sash
