

News item 14th Mar 2009

All of the precision made parts required for the **eurosash** sealing system are now in stock and are being fitted to every window free of charge.

We have also fitted the new parts of the sealing system to a sample window which we will send to Wintech window testing & laboratory services that have a fully accredited UKAS test rig. We know that the window seals so much better using the new system so now it is time to find out exactly how good it is.
