

Eurosash Does It Again!

A new development for sliding sash giving you an exciting sales advantage.

Dungannon Windows has engineered a fly screen that slides up and down with the top sash. Completely hidden in the top of the outer frame this fly screen is a new innovative addition to the *euro*sash.

This product will be in full production in the New Year. Applications for use: Kitchen windows, farm houses, catering college, hospitals basically anywhere there are insects.

See our display at Expo RDS Dublin 3rd - 5th Nov or Millstreet Cork 6th - 8th Nov.

Our design and production team are currently working closely together to install the fly screen in the bottom sash as well. We will keep you posted on their progress.

FOR THE RECORD

'C' energy rating now as standard on all sliding sash.

'B' energy rating available as an upgrade.

Our window air leakage heat loss W/(M²-K) 'L' factor 0.01 one of the lowest on the market. Don't be afraid of pressure testing on new houses.

B.S. 7950 enhanced security has been a big hit, over 50% of our production now with security. (a must for ground floor windows)

eurosash will have our 'A' energy rated sash window in production for Christmas 2009.

At last our new website is finished, log on it's a great selling aid especially if you have a client with you.
